

MUKHTAR ADEN OSMAN

SOFTWARE ENGINEER

I am a dedicated and detail-oriented Computer Science student at FSKTM with a strong passion for software development, system design, and problem-solving. I enjoy building practical applications that combine functionality with user-friendly design. I have hands-on experience developing desktop applications using Java and working with backend systems using PHP and MySQL.

SKILLS

- Programming & Development: Java (OOP, Swing GUI), PHP (backend), HTML & CSS
- Database & Tools: MySQL, XAMPP, Git
- Software & Technical Skills: Desktop app development, UI/UX design, debugging, system design
- Soft Skills: Problem-solving, teamwork, time management, adaptability

EDUCATION

Bachelor of Computer Science (FSKTM) (Current Student)

- Relevant coursework: Programming, Database Systems, Software Engineering
- Actively involved in practical and project-based learning

EXPERIENCE

Software Development Experience

- Developed and maintained applications with a focus on functionality and user experience
- Worked on both desktop and web-based systems using modern technologies
- Applied problem-solving skills to debug and improve system performance

System & Database Management

- Designed and managed databases to store and retrieve application data efficiently
- Ensured proper data handling, validation, and integration with applications
