D. SYSTEM/ SOFTWARE BACKGROUND:

1. Objectives

- 1- To develop a secure web-based e-commerce prototype that facilitates online transactions for small businesses.
- 2- To implement robust web security measures, including data encryption and secure authentication, to protect sensitive user and vendor information.
- 3- To identify, manage , and mitigate system security risks using OCTAVE methodology.

2. Input

- 1- Account registration and login credentials from users.
- 2- Store information, product details, and inventory data uploaded by vendors.
- 3- Shopping cart selections, shipping addresses, and secure mock payment details submitted by customers.

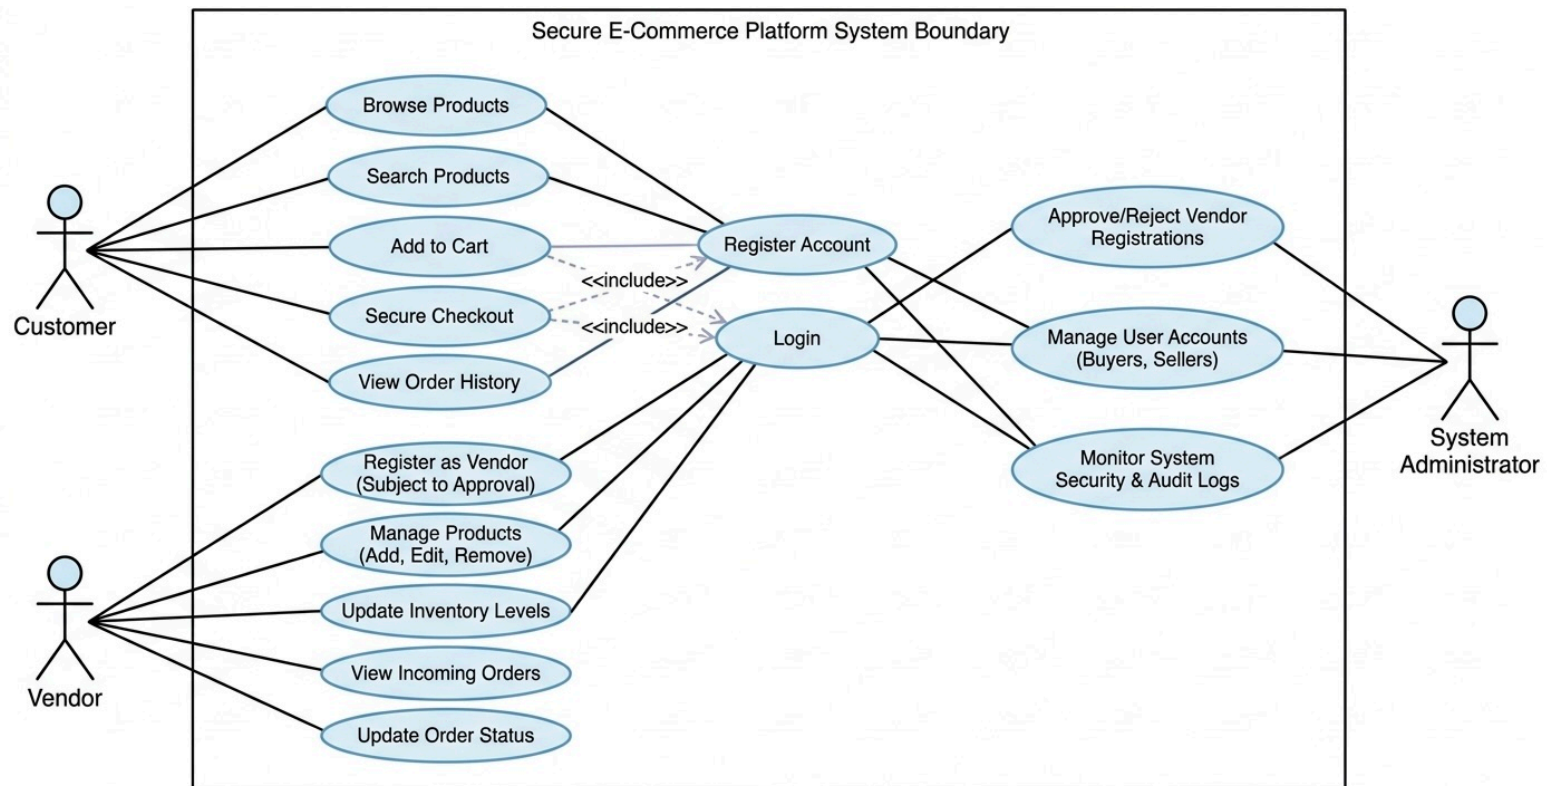

3. Process

- 1- Authenticating user credentials using password hashing and secure session management upon login.
- 2- Validating and sanitizing all user inputs to prevent common web attacks, such as SQL injection and Cross-Site Scripting (XSS).
- 3- Enforcing role-based access control (RBAC) to ensure that customers, vendors, and administrators can only interact with authorized data.
- 4- Processing shopping cart data securely to update inventory levels and generate order statuses.

4. Output

- 1- Secure, personalized web interface dashboards tailored for both buyers and sellers.
- 2- Encrypted order summaries, transaction confirmations, and digital receipts.
- 3- System audit logs that record successful transactions, login events, and blocked unauthorized access attempts.

5. Use case diagram

E. Gantt Chart (please attached at the end of this appendix)

Project Phase / Tasks	Wk 5	Wk 6	Wk 7	Wk 8	Wk 9	Wk 10	Wk 11	Wk 12	Wk 13	Wk 14	Wk 15
1. Planning & Proposal											
Propose Title & Submit Appendix A											
Title Approval from Lecturer											
2. Security Requirements (OCTAVE)											
Construct Security Requirements (OCTAVE)											
Review Session: OCTAVE Security Requirements											
3. Software Req. Specification (SRS)											
Construct SRS (IEEE Format)											
Review Session: SRS (IEEE Format)											
4. Prototype Development											
Develop Secure Prototype System											
5. Final Submissions & Testing											
Submit Final SRS, CD Prototype & Forms											
Conduct Software Testing based on SRS											
6. Presentation											
SRS and Project Presentation											

F. TITLE APPROVAL (Filled in by lecturer):

This title

A CAN BE PROCEED

B SHOULD BE REVISED

C REJECTED
